www.fmlm.ac.uk/membership

"It felt like I was doing it on my own and struggling to find the best way to learn more about medical management... what I think the Faculty does, is brings together all the opportunities that exist out there for trainees and medical students and makes them readily accessible."

Dr Emma Stanton,
Psychiatry Specialist Registrar

"For twenty years or so I've been involved with various levels of management and leadership and it feels like the Royal Colleges and the medical profession have found a home for a lot of the work that I do."

Professor Bernard Crump, Consultant

"There are hardly any visible BME staff in leadership positions in the emerging NHS architecture; I hope that the Faculty can help to redress this gap and that together we can bring about some much needed cultural changes in the health system."

Dr Rajan Madhok, Medical Director
